

Memorial Tree Initiative

The Ash boar disease that impacted Central Kentucky over the past few years, has decimated our tree canopy throughout our property. The staff and Facilities and Property Committee have been working with [Tree Lexington](#) and [Seedleaf](#) to help replace what we've lost. Recently, we've learned of being awarded a \$ 2,000 grant for beginning to replace what we've lost with new plantings. In addition, the neighbors of Charlie Powers donated funds to provide a couple of more substantial trees to be planted in his memory. Members and groups in our church may wish to establish funds for memorial trees to honor others we've lost in blessed memory over the past couple of years. The amount for securing and planting more mature trees is estimated as between \$ 250 - \$ 500. If you are interested in helping fund such an effort, please speak with Mark or Charles.
